Customer No.: 026148

METHOD AND ARRANGEMENT FOR  
EVALUATING IMAGES TAKEN  
WITH A FUNDUS CAMERA

**AGENDA FOR EXAMINER INTERVIEW**

The following is a proposed agenda for the telephonic interview scheduled for Wednesday,  
February, 4, 2009, at 10:00am:

1. Discuss whether the addition of either of the following limitations to independent claim 7 or 11 would overcome the current anticipation rejections:
  - a. wherein the stored comparison image is not a prior image of the object being evaluated. (Sinclair does not compare the contextual information of new eye image to the contextual information of an eye image of a *different* eye.)
  - b. retrieving from a database of images those images having similar contextual information;
2. Discuss whether Sinclair analyzes the setting of the fundus camera or manual annotations associated with the recorded fundus image.
